WELCOME TO WINRAE DORPERS & WHITE DORPERS

This year we are celebrating 27 years of Breeding Dorpers for Australia's Tough and Harsh Climate. We started in 1998 with 5 embryo's from Tien Jordaan, that were born in 1999, thus Establishing Winrae Dorpers!

We have been predominately Dorpers since then, adding a small number of White Dorpers in 2023 and we continue to grow those numbers. We have a small offering of White Dorper Rams again this year, with the aim to have a larger amount in our 2027 Sales.

Our Natural focus allows us to push for fertility and performance in lamb rearing and lamb quality produced by each ewe. We syndicate mate in larger paddocks at a rate of 1-2%. We class our ewes before each joining, based on conformation and lambs raised, with an extra focus on quality of lambs produced by each ewe. Our classed out ewes are sold to the meatworks.

Ewes are the back bone of our Stud and our strict selection produces the Quality Stud and Commercial Rams we have on offer each year. We maintain our ewe base of 650 ewes on grass country with mineral licks always available and we expect the ewes to maintain their weight and reproduce on native pastures both here at Warialda and at Moree.

Our Rams are raised on native and improved grass country and also maintained with mineral licks. They are supplementary feed a maintenance ration, (not feedlot conditions), of grain before Sale time to have them presenting in a good condition. We have a strong line up of Rams this year that are raring to go and aren't over fed and over fat, so when you put them out to work, they won't melt and lose heaps of weight. Our clients often comment that our Rams come in after joining in the same condition they went out and have very high conception rates.

The Dorper is hugely popular, and we are seeing the market expanding and the lamb market being extremely strong for over the hook prices. Very exciting times to be in Dorpers and for those new to the breed, welcome! We are only a phone call away if you need any advice and we happily offer our services to our clients by way of education, classing and breeding advice.

We are a family owned and operated Stud, with Nick and Mel operating the day to day work and any of our Sons or Daughter,

Billy, Jack, Pete or Grace helping when they are home for Sale time.

WHY BUY WINRAE DORPERS?

Our Dorpers are Performance recorded with Lambplan, and to guide our clients we have all our Sale Rams Visually Assessed by an Independent DSSA Inspector. We use the Classmate Assessment App as a visual guide to where our Dorpers are correctly structured and could be improved. We utilise DNA Testing for full parentage and genomics plus eating quality traits.

We breed Dorpers that are Bred and raised Naturally, run on grass country to grow as nature intended and with a moderate frame that will enable Dorpers to reproduce under extensive conditions. Our Sale Rams are bred to produce lambs that are high yielding and quick maturing for increased cash flow for your operation. Our clients success is our priority and we wouldn't be here without your valued support!

We have vast experience in breeding commercial dorpers as well as stud and know what meat buyers are looking for in a carcass. We breed a well fleshed, balanced structure into our Rams so you can achieve higher yields and better dressing percentages using our genetics. Winrae Dorper butts stand out and we are known for our meaty, deep, long hindquarters!

We are passionate breeders that have seen the Dorpers start in Australia, to the market exploding like they are now and are humbled by the experiences we have faced as breeders, and we share in the tough times as well as the good with our clients and extended Dorper Family.

We understand we don't always get it right, but we are focused on breeding the best Dorpers and White Dorpers we can for the benefit of our clients and the Dorper breed itself. We hope to improve the structure of the breed and be consistent in what we produce so the flow on effect is benefitted by the next generations of Dorper breeders to come!

WINRAE DORPERS SALE INFORMATION

SELLING AGENT

Nutrien Russell, 37 Linsley Street, Cobar NSW 2835
David Russell: 0418 636 050
Email: david.russell@nutrienrussell.com.au

REBATES

3% Rebate to outside agents

To claim a rebate, a letter of introduction needs to be emailed to David Russell, 24 hours prior to Auction, or in person on Sale Day.

SELLING SYSTEM

Sale of rams will be conducted on site and is also interfaced with Stocklive, with live Audio. Each Lot will be sold separately. Please register online at www.stocklive.com.au at least 48 hours prior to the sale.

VISUAL EVALUATION

Winrae Dorpers Sale Rams are selected by Nick and Mel and we are proud to make them available for Sale with the following visual assessment systems we use:

DORPER TYPING SYSTEM -Christo Harmse, an independent DSSA Dorper Inspector, visually assessed our Sale rams under the Dorper Breed Standards for correct conformation and carcass traits, on 20/01/2026.

CLASSIMATE -Visual Data Assessment App, is also utilized to give you specific information on each individual Ram's conformation. This is presented with a score and a visual graph to identify where the strengths and weaknesses are.

Both systems used together give the purchaser confidence they are making the right choice.

SEMEN RIGHTS

WINRAE DORPERS reserves the right to collect semen from any ram offered, for use within own flock (unless otherwise stated). This collection of semen is to be done at the convenience of the purchaser and at the cost of Winrae Dorpers.

ANIMAL HEALTH AND QUALITY ASSURANCE

LAMBPLAN RECORDED - performance recording for ASBVs

DNA GENOTYPING – Full parentage and genomics test (50K)
and eating quality trait info

OVINE BRUCELLOSIS ACCREDITED FLOCK, OB-AR CERT 76710 - EXPIRY - 30/11/26

ON FARM BIOSECURITY PLAN VACCINATION PROGRAM:

ULTRAVAC 5IN1 - 15/2/26

DRENCHED – TRIDECTIN 15/2/26

RAMS PALPATED AND TEETH CHECKED 31/1/26

HEALTH STATEMENTS/NVD

OWNERSHIP & INSURANCE

Ownership of the ram/s falls to the buyer at the fall of the hammer. Insurance of rams against injury or death including during transit is the responsibility of the purchaser.

Please insure your rams against loss of use and transit insurance from the fall the hammer on sale day. For information on Nutrien Insurance please see the Nutrien Livestock Specialist at the Sale Desk.

Transit insurance is available upon registration at buyers cost. Of course, we look after the animals to the best of our ability, but accidents can happen.

DELIVERY

We take care in the efficient delivery of all stock after the sale. Nutrien agents will be handling the delivery of rams & ewes after the sale.

NO STOCK WILL BE LOADED UNTIL AFTER THE SALE IS COMPLETED!

FREIGHT AND TRAVEL

We are willing to hold animals for a reasonable period to allow for coordination of transport to their new home. We can provide recommendations of suitable stud stock carriers and will assist wherever we can for safe and efficient transport of animals to your home property. All due care will be taken for the safety and health of your purchased rams and or ewes prior to pick up or delivery, however, to protect your purchase, you may wish to consider insuring your rams and ewes from the conclusion of the sale. *Ask us about our delivery runs to major areas in QLD and NSW.*

WINRAE DORPERS SALE INFORMATION

GUARANTEE

Any ram which proves to be structurally unsound, infertile, or incapable of service (not resulting from an accident), is guaranteed for 1 year. The guarantee shall apply providing the rams incapacity is not caused by injury or disease contracted since leaving WINRAE DORPERS. If any ram does not possess reasonable fertility, although not totally infertile, an agreed veterinarian can be used to ascertain the status. The guarantee covers the purchase value of the ram or ewe. This does not cover infertility due to injury, misadventure or disease contracted since the sale of the ram or ewe. Insurance covers this. A veterinary certificate may also be requested at the vendor's discretion.

The ewe or ram shall be returned in the event of an animal failing to breed and either be replaced with an animal of comparable value or credit to the full purchase price will be given at the following sale or on a private sale animal (if available).

NO COLOUR GUARANTEE

Due to the genetic makeup of the White Dorper, some Rams may throw red colour, it is usually light and fades with maturity/time. They will have excellent pigment and have no problems with cancers.

LUNCH & REFRESHMENTS

Please join us for a Winrae Dorper smoked lamb lunch. Refreshments are provided by our Local NAB Agribusiness Inverell. Stay and join us after the sale for refreshments if you aren't in a hurry to get home!

WARIALDA ACCOMODATION OPTIONS

Warialda has 2 accommodation options:

The Sunflower Motel: (02) 67291344

Warialda Caravan and Cabin Park: 0427 291 008

Australian Sheep Breeding Values (ASBVs) are an estimate of an animal's genetic potential to pass on traits to its progeny. It is based on:

- Pedigree (genes)
- Performance recorded information (weights, scanning for fat depth and muscle, birth type)
- Environment in which it is raised (birth type, old or maiden mother).

They are essentially a projection of how that animal's progeny will perform for a range of traits. ASBVs provide a measure of the animal's genetic potential independent of environmental influences that can affect the physical appearance.

It is important to know that ASBVs are one of the tools used for breeding sheep, they do not provide all the answers. Visual selection is very important to be able to cull out sheep that have poor structure/conformation as this is not tested for in ASBVs.

KEY BENEFITS OF USING LAMBPLAN IN A COMMERCIAL FLOCK:

Genetic evaluation - Lambplan provides a comprehensive genetic evaluation system, allowing producers to analyse a ram's genetic potential across multiple traits like growth rate, carcass quality, and through ASBVs

Improved selection - Utilizing Lambplan data allows for informed ram selection, choosing rams with the most desirable genetic traits for the specific production goals of the flock.

Market suitability - Commercial producers can use Lambplan to identify rams that will produce lambs meeting specific market requirements.

Genetic Progress - By consistently selecting rams with high ASBVs, producers can accelerate genetic improvement within their flock over time.

A balanced set of selection criteria is essential. It is critical not to chase excessive traits such as high growth, if your environmental conditions and feed availability do not suit. It is far better to have good muscling and positive fat cover for when times are tough, than animals that are too big and take twice as much feed to maintain when it gets dry.

TRAITS MEASURED

There are a variety of traits that can be measured and recorded. Data we collect includes:

- ✓ Parentage—Sire and Dam
- ✓ Date of Birth
- ✓ Birth Type
- ✓ Birth Ease
- ✓ Rearing Type to weaning
- ✓ Weights - Weaning (WWT), Post Wean (PWT), Yearling (YWT)
- ✓ Carcase - Post Wean Eye Muscle depth
- ✓ Fat - Post Wean Fat Depth

SELECTION INDEXES AND WHAT THEY MEAN:

WEIGHT ASBVs describe the animals' genetic merit for growth rate.

BWT – Rams with more negative BWT ASBVs produce lighter lambs at birth. (Which Dorpers are meant to do, increasing growth rates very quickly after birth)

WWT - 100 days PWT - 225 days YWT—365 days

PWT - Rams with more positive ASBVs produce lambs that grow quicker and reach target weights quicker.

MWWT – Rams with a more positive Maternal Weaning Weight ASBVs will produce daughters that wean heavier lambs.

CARCASE FAT ASBVs describe the value of an animal's genes for fat depth at a constant weight. We recommend a positive PFAT

- ✓ To survive better in tough conditions and dry times.
- ✓ Fat increases the ability of breeding ewes to maintain weight and condition, conceive twins, better milking and mothering ability and survivability.
- ✓ Increases the eating quality due to intramuscular fat.

CARCASE EMD ASBVs describe the value of animals' genes for eye muscle depth at a constant weight – a positive ASBV means a genetically thicker-muscled animal, and one that will have slightly more of its lean tissue in the higher-priced cuts.

PEMD - Rams with more positive ASBVs for eye muscle depth (EMD) produce lambs that have a higher lean meat yield.

- ✓ Increases the value of the carcass, by increasing the amount of lean meat it contains and increases dressing percentage.
- ✓ Increases the amount of meat on higher priced cuts. Higher muscling is favourably related to reproductive rate.

LEAN MEAT YIELD AND EATING QUALITIES

Eating Qualities (EQ) balances large improvements in eating qualities with modest increases in lean meat yield.

Lean meat yield (LMY) Rams with a more positive LMY produce lambs that have a higher lean meat yield at slaughter. It is expressed as a percentage of hot standard carcass weight (where all bones and salvage fat are removed).

Intramuscular Fat (IMF) Rams with more a positive IMF trait produce progeny with more intramuscular fat. It is a measure of the fat percentage in the loin muscle of a lamb and is often referred to as marbling! IMF can show a significant impact on flavour, tenderness, juiciness of lamb.

Shear Force (SHEARF5) Rams with a more negative ShearF5 produce lambs more tender meat. It measure the force of energy required to cut through the loin muscle of the slaughtered lamb after five days of ageing.

MCP INDEX (MATERNAL CARCASE PRODUCTION)

MCP is for a self-replacing system with a carcase production focus, where there is no mating to Terminal Rams. This index balances the main economic traits relevant to Maternal breeders. This allows higher gains to be made for high early growth rates and increasing maternal weaning weights and improving carcase traits. Plus good reproduction performance such as increasing weaning rates. The index aims to maintain adult weight at current levels. It tries to achieve an optimal balance across all these traits to improve your profitability

Lambing Ease (LE_DIR) is a trait that defines the genes a Ram's progeny will have for easy birthing. A higher LE_DIR value is more desirable. It is a trait to address lambing difficulties while having minimal impact on the rate of progress for growth and other important production traits.

GENOTYPING—DNA COLLECTION

Collecting DNA from our ewes and rams is allowing for accurate parentage and to assess their genetic makeup. This in turn increases the accuracy of ASBVs. Genotyping reports on the key drivers of sheep meat eating quality with values for lean meat yield, intramuscular fat and shear force. We join ewes with lambs on them in multi-sire groups for ease of management and to mimic commercial reality. DNA parentage testing can relieve some management constraints from multi-sire lambing to obtain accurate parentage.

our rams breed lambs like this

WINRAE DORPERS SALE TOP RAMS

We are excited to announce that two of our top-quality rams will be available for purchase in this year's sale. This is a fantastic opportunity to secure exceptional rams for your breeding program.

2025 SALE TOP PRICE RAMS

Top Pric Dorper Ram Black Panther \$5800

Top Price White Ram 2025 Sale \$7500 Nomuula Creed, sons in this Sale

Thank you!

Thank you to everyone who participated in our recent sale. Whether you were a successful purchaser, an underbidder, or simply in attendance, your involvement was valued. We hope that those who made purchases find them to be successful additions.

We'd also like to extend our sincere appreciation to those who traveled to attend. We recognise the time and effort you dedicated, and wish you safe travels home.

A special thank you to our auctioneer, John Settree, for his expertise, and to David Russell and Hamish Adlington of Nutrien Russell Cobar for their invaluable assistance.

Finally, we express our deepest gratitude to all of you for your unwavering support over the past 27 years. Through good seasons and challenging ones, your support as both clients and friends has been essential to our success.

Nick and Mel Pagett
